Enhance your accounting or business-oriented software with readily available professional Business Toolbar Icons. Over a hundred of professionally designed and carefully crafted icons representing various financial objects, symbols and actions are included in a variety of small and large formats. Developing software for stock market or currency exchange professionals? Business Toolbar Icons come with icons to represent various stock and currency symbols. All major currencies are drawn professionally, including the Yen icon, Dollar icon, Pound and Euro icons. Growth and Recession are easily and immediately recognizable, making the trading process

faster and less stressful. Making an insurance product? The Insurance icon as well as Calculator icon will be right in place. Piggy Bank and Income, Card File and ATM icons are depicted carefully and professionally. Financial, trading and cash register applications will benefit from symbols representing Cash, Currency, Cash Register, Auction and Capital Gain. Each icon in the set is carefully matched with all other images in the collection, making your application look slick and visually consistent. All the easily recognizable symbols will make user interface cleaner and less cluttered, whereas the available XP icons will give your project modern looks. Business Toolbar Icons set contains more than two hundred icons in various resolutions and file formats. Semi-

transparent icons with alpha-channel are great for using with Windows XP computers, while 256-color 8-bit formats are perfect for a business terminal or a server. The icons come in all standard sizes including 16x16, 20x20, 24x24, 32x32, and 48x48 pixels. Each icon is delivered in three states: normal, disabled, and highlighted. Business Toolbar Icons come in all of the following file formats: Windows Icon (ICO), Bitmap (BMP), GIF, and PNG.

1. Field of the Invention This invention relates to an ophthalmologic measuring device which uses a so-called lenslet image sensor to read an image recorded on the retina of the eye to be examined and a so-called image processing circuit for processing a read image to obtain various forms of

ophthalmologic information. 2. Description of the Prior Art An ophthalmologic measuring device such as an ophthalmoscope and an ophthloscope, for example, are so designed as to enable measurement and observation of the fundus of the eye to be examined and therefore, these devices are operated by positioning the pupil of the eye to be examined by a pupillary lens and having the eye to be examined fix his eyes on the target. Such a measuring device is generally required to be made as compact and light-weight as possible so as to be portable, and accordingly, when the eye to be examined is positioned by the pupillary lens, the eye to be examined is required to have a 77a5ca646e
