The golden age of krautrock, the Romantic era, the "pretend your best friend is a briefcase full of cash" era… music in its truest form. These were the days of the cassette tape and the vinyl record. The days where the producer and the artist had their full creative control. The days of expensive equipment. The days when the sound of the music was still relative to the time it was produced and the record was still art. No longer does the sound of a song have to be sacrificed for the sake of mass consumption or superior technology. The analog record is gone and the cloud is the new record. Music is being made faster, louder, more intricate, but it's not being produced with the same spirit or the same type

FinalCrypt is a secure encryption utility that allows you to protect any number of files using a secret cipher file. It provides a traditional two-panel interface, which can be accessed at any time to manage your files, encrypt them, decrypt them, move them to other storage, or create an archive. Once files have been encrypted, the original items will be deleted and replaced with the.BIT extension, so that they can be securely archived. Transfer files securely by encrypting them using the.BIT extension and decryption them using a cipher file. You can import any number of files at once using the import option. View a quick tutorial to gain an understanding of how the software works. Useful encryption utility that is not that easy to use While FinalCrypt is a good app for encrypting large volumes of data, it is not very well designed. Most notably, the UI seems a bit too advanced for what it offers, which makes it a bit confusing for beginners. FinalCrypt has a number of options you need to fully appreciate, and some of these options can be a bit overwhelming, even to an advanced user. Use this encryption utility to back up your data FinalCrypt is intended to be used to protect any number of files, including pictures, videos, and other images. To help you get started, a tutorial is provided in the application's Help section, allowing you to learn how to use the app from the beginning to the end. Regular expressions allow us to easily search for a string of text within a larger string of text. For example, the string "lorem" can be found in the text "ipsum dolor sit amet, consectetur adipiscing elit, sed do eiusmod tempor incididunt ut labore et dolore magna aliqua." Regex can help search text for words such as "lorem," "ipsum," and "sit." If a text string contains the string "lorem," it will match the regex and return the text "lorem." For more complex regex, such as patterns to search a web page for a string, this tutorial will explain how to use regular expressions to search for a specific phrase within a web page. Regular expressions allow us to easily search for a string of text within a larger string of text. For example, the string "
