Editor's Review UtilTools Antivirus-Security has an easy to use interface and is easy to install and run. You can activate it with a free 30 day trial, so you will get to see if it fits your needs. Simply install it, then use the right click option to activate the program for free for 30 days. Then, if it doesn't suit your needs, you can buy the program by paying just \$29.95. We liked that there was a trial version and that it was free to use. For that, we give it 4 stars. We also liked that it has a manual to walk you through installation as well. With 4 stars, it gets the thumbs up on our success rating. There is a free version of this security program. You will get the same protection for free but you will not get updates automatically. There is a 30 day money back guarantee. The full version at \$29.95 is a bit expensive. We give it 3 stars for the free version and 4 stars for the full version. At first, we were a little concerned about the effectiveness of this program. We were looking for an antivirus that was easy to use. By the end of our 30 days, we found that the program worked fairly

UtilTool Domain Protector is an anti-spyware tool made to protect all Internet browsers, including Microsoft's Internet Explorer, Mozilla's Firefox and Google's Chrome. It ensures that only trusted websites can access your PC and directs dangerous sites that might harm it to a new Internet browser window. The program also removes malware and custom search engine recommendations that are created by adware and malware. Advanced malware detection UtilTool Domain Protector consists of a customizable combination of proactive and real-time protection that is suitable for everyone, regardless of their knowledge level. The tool disables the use of non-standard sites and disables the links that point to them, as well as downloads files from sketchy sites. It also deletes malicious search engine suggestions and removes adware and malware infections. It is, however, possible to modify the settings so the program doesn't stop you from visiting any specific websites, changing the definition list, or installing new websites to ensure certain pages are accessible or the browser is redirected to a blank page. Advanced Zone Scanner The program includes a Zone scanner that performs a thorough examination of the most essential files, folders, programs, search providers, and websites that are included in the Dynamic Update Zone. It only looks into these locations to ensure that nothing dangerous can intrude your PC. Restrictions to prevent loopholes It is possible to restrict what Internet applications and browsers can run and where they can access the internet. The settings can be changed using a special panel that includes options to block some popular search engines, programs, and websites that are known to be malware-friendly. Some of the restrictions include blocking malicious download sites and all Live Forex reviews online advertisers. Discrete and easy-to-use interface UtilTool Domain Protector is wrapped in a clean and intuitive interface with a dark, light and thick color scheme that is easy to read for all users. The interface includes a specific toolbar that contains two flexible tabs – the left one includes the schedule, add, update and remove tool icons, while the right one includes the scan results. A real-time guard and a comprehensive log viewer are also included in the interface to show users the current security status. Despite its advanced features, the program is easy-to-use so even a novice user can run a scan. Eval
