Hey guys, we have a new project, and we need some help! In this new video-project, we're going to play/record the game Dose of Minecraft. The main idea of this new project is to play and record as much as possible as a team and as usual, as entertaining as possible. We will start with a first recording today, Saturday 11th of March and will continue as much as possible. Any help with recordings is welcome. Not only recordings, but also questions about the game or technical stuff are welcome as well. If you want to join the game in any moment or if you are not familiar with the game, just let us know via email Hello Dose members! We have finally decided to make this new compilation, all the members (except Demerit) are finally gathered together, we have started recording and let the fun begin! This will be a collaborative video, which means that if you want to take part of it you have to choose the language you want. Depending of the video, I'll take the lead and we'll let you know how it goes. Alright, enough with the introduction, let the games begin!
