Field of the Invention The present invention relates to a high frequency treatment apparatus, more specifically to a high frequency treatment apparatus for a live body to be treated using a high frequency such as a microwave or an RF (Radio frequency). 2. Description of the Related Art For treating a live body, such as a human body, by a high frequency treatment apparatus, for example, the technique disclosed in Japanese Laid-Open Patent Application (Kokai) No. H07-287871 has been proposed. This high frequency treatment apparatus is provided with a body sleeve that covers a part of a human body from a waist side to a thigh side, a plurality of temperature detecting units that are disposed to be parallel with an arm of the body sleeve in the arm width direction thereof, and a belt-like high frequency antenna disposed along a portion of the body sleeve where the plurality of temperature detecting units are disposed. The high frequency treatment apparatus is capable of controlling the temperature in the treated region by adjusting the high frequency antenna in accordance with the body temperature of the live body, when the live body is treated by the high frequency to thereby keep the temperature of the live body at a constant level. When the body temperature of the live body is controlled at a constant level in order to keep the temperature of the live body at a constant level, however, the high frequency is applied to the b7e8df5c8
