Loot and experience are not the only things that characters need in their quest for a better future. They also need a hero. In Legends of Pixelia, you will have to help your favorite characters get to the top. Through skill in combat, strategy and character development, you will help them climb to the top of the game's many dungeons and battle hard bosses. Are you ready to make your mark on this fantasy world? Controls: There are 5 different character classes to choose from when you start out in the game: Warrior, Archer, Mage, Hunter, and Rogue. Players will have to unlock them over time with experience and coins earned in battle. Advancement: Your character will level up and earn more stats every time you defeat a monster or run into a puzzle. These stats are represented in 3 bars: Power, Intelligence, and Health. Power increases the damage you deal, Intelligence increases your attack speed and your maximum power, and Health increases your HP. As you level up, you'll also be able to earn skills. Skills are the abilities that will help you advance in the game by mixing certain stats together. Familiar Battles: Each character has their own set of skills that they learn over time. Each of these skills has a set of attacks that can be mixed together to create their own unique combos. As you do damage with your attacks, you gain EXP which will allow you to level up. Each character also has their own unique type of equipment that they can equip on their character. They can also level up with the same skills and equipment that you use. Awards & Accolades: "This is just a bit of what Legends of Pixelia has to offer. I really like how this game looks and plays. The player experience is solid." - Michael 'Lukewarm-Lego' Corwin. "Archery is a wonderful solution to... every problem, and in Legends of Pixelia, it is one of the most distinctive things about it." - Stephanie Kung. "The interface is very very clean, and everything is pretty easy to understand" - Lucas Krakau. "The animations are all seamless... they just work, and flow from one point to another really fluidly..." - Ben Lahr. The Gothic Room 4/5 - Indie Game Magazine "... it successfully combines both the first-

Dungeon Rustlers

The mighty modern western has been transformed into the most brutal frontier in the game's history. No longer can you treat your fellow man with bravery and solidarity. Horses are dead, and the bordello owners are out to get you. You're standing at the crossroads of a real-time adventure. Your new hometown is the most exciting town in the West: Gloryville! Grab your guns, gear, and rodeo hat and play the part of the latest lawman for the day. Don't worry about keeping your Westerner character alive, because his fate is in your hands. As the gunslinger, you take a job from the sheriff and protect Gloryville from outlaws. Ride into adventure and do battle in town squares and across the prairie. Then, when the dust settles, a new situation arises: You're no longer a lawyer. The sheriff is dead! Your journey has just begun, and only one question remains: Who will you be? Everything you're seeing is rendered in real time: the scenery, the characters, and even the hanging tree! Vivid imagery and soft, soothing sounds take you to a wild new frontier! Here are some things we really loved and some things we don't like: FEATURE REVIEW: It's a great Adventure, but it's a little bit disappointing. It's very like to Castlevania: Battleliots, but not the exact same, there are some things that is a lot different from others Adventure battle, but it's a very fun, addictive game. I recommend all the people that likes Adventure games. Also, the characters, since I like only the rogue in the game is very attractive. I think that to new people there is a little difficult to understand, because they've never played an Adventure, but I assure you that it's a very attractive game and if you like rogue classes, you will love. The story is very gripping and a very good point of the

game, in the graphics, blastfort is like a cartoon, like a cartoon that you've never watch, or you like to play a video game like the steel storms or the beautiful castle of the game, so it's very attractive. **DESIGN REVIEW:** The design is as best as other Games, Mario style with Blastfort's characters style. **UPDATE:** The Blastfort doesn't work very well, it's very lagging. I think that to add more packages may fix

The food of Amazonia is a popular plant-based food. Each player can have his/her own personal food between each meal. At this time, the forks can be inserted into the meat, and then can be pulled out to eat. When each of the forks is inserted and pulled out of meat, the right handle of the knife, as well as the trigger button, is used to confirm. When the right handle of the knife is pulled out, the fish is caught by the right handle of the harpoon, and is then inserted into the fish basket. When the fish basket is filled, it will be possible to fish. The scoring button is used to confirm the score. The left handle of the fishing harpoon is used to confirm and remove the fish. The game operation of "Tiger Master 3" is easy, and is only about fishing with the fish. Players can fish with various kinds of fish in the game. Players can experience various kinds of fishing in this game. Players can experience the game that is fun, and that is also addictive. **Q: Get Button State (disabled/not-disabled) in JS** I have a div with some buttons on it. The original state of the buttons are like so: The `id="lButton_2"` may be the button being pressed, when you hover over it you will be able to see the tiny image, while it is not hovered over, it is hiding. Using pure JS, I would need to return the state of the button so it can be toggled disabled and then re-enabled using a switch statement. I would ideally like to either just disable it, or have the user click on the button again to re-enable, rather than having to keep an array of disabled buttons and enable/disable them by 1. Any ideas on how to do this?
