It is the most dangerous missions, the most interesting activities.Racial differences in outcomes after coronary revascularization: insights from the Patients' Choice trial. The impact of ethnic or racial differences in coronary artery disease (CAD) on outcomes after revascularization remains undefined. We hypothesized that these differences exist and perform an analysis of these differences in patients enrolled in the Randomized Comparison of Revascularization Options in Myocardial infarction (PRIMO) trial. Ten-year follow-up data from the PRIMO trial and a population-based sample of patients from the Coron
