In addition to hosting a much touted tea festival, the city also boasts a distinguished, national-recognized tea shop movement, helping Boston to become one of the top tea shop cities in the country. There are several tea shops in Boston: Stash Tea Company, Nice 'n Sassy Tea, On Beijing's Danforth Row, and Pure Moods. A few blocks away from the shops, Amherst Street overflows with great ice cream. Share This Story About the Author Dee Latch is a Boston-based travel writer and photographer. With a passion for the outdoors and a curiosity for people and cultures, she has traveled to 35+ countries. And even though travel has been her main source of inspiration, over the last few years, she has developed a fondness for good food, good books, and the written word. Dee writes about food and travel for Eat the World and has been featured on USA Today and The Huffington Post. She also writes a regular food and travel column for the Newton Press and has a weekly feature, "Tea Time With Dee"

on Stone Soup Radio. 10 Comments I second whome comments above about Stash. They have the best quality tea and, for tea lovers, there is a very specific expierence that's hard to come by. They also do nice food. Great concept and unique concept. Absolutely! Stash sells the same stuff I get at my local tea shop. I love their rosewater Earl Grey, for example. And their chai. But, if you don't want to spend a lot of money on tea (which I usually do), or if you're just looking for a quick,

1 Bumble Butt 1 is an American pornographic film, written, co-produced, directed and co-edited by Ron Jeremy, and starring Bambi Cantrell. It was released April 16, 1999 by Osiris Video. Plot Woman 1 The credits begin, "Prepared by: Eric Crisman". At the beginning, a black male leads a white female into a room, where there is a desk and a telephone. The female gets undressed, and lays on the bed with the male, who kisses her and begins to caress her body. She pulls him on top of her, and he enters her from behind. He kisses her once again, and she turns around in his arms, and is led to the bathroom. The male closes the curtain behind them, and the female gets undressed, and is placed in the shower with two hairspray cans. The male is put on the balcony, and after a short while, both run into the pool room. The female climbs into the male's lap, and he places her on the floor. After kissing, he pulls down his pants, and thrusts himself into her vagina. The film ends with a monologue as the male walks into the pool room while masturbating, (which contains a 2-minute fight between him and the male lead) and they hear someone ring the bell. Woman 2 After the credits, another black male leads another white female into a room, where there is a desk and a telephone. The female undresses and lies on the bed, while the male stays standing next to the bed. The female lies down and puts her head on her arm as the male attempts to enter her from behind, however, she turns around and he ejaculates, with the stream of cum falling into a bowl. The female gets up from the bed, and flings the bowl to the ground. She continues to sit on the bed, while the male gets up and picks up the bowl containing semen, and then opens the door to the room, where the female is now standing next to the bed. After kissing, she climbs on top of the male, and takes off his pants. As he pushes her off, she turns around and sits on the floor, and pulls down her pants, as he puts his right hand underneath her skirt, while his left hand goes through her hair. As the male begins to enter her vagina, she raises a hand to remove his glasses, but turns around and r

I want my UIScrollView to shrink when the user minimizes the application and UILabel to keep its size. I tried setting UIScrollView frame to not fit its parent view: self.scrollView.contentSize = CGSizeMake(320, 748); self.scrollView.frame = CGRectMake(0, self.view.frame.size.height-self.scrollView.frame.size.height, self.view.frame.size.width, self.scrollView.frame.size.height); and also self.scrollView.contentSize = CGSizeMake(320, self.view.frame.size.height); But both of them did not work. How can I fix it? Thanks. A: I found my answer. I was setting width and height of my UIScrollView. self.scrollView.contentSize = CGSizeMake(320, self.view.frame.size.height); The problem was that I was setting size of my scrollView to fit its parent, not the view(UIScrollView) itself. So I had to self.scrollView.contentSize = CGSizeMake(320, self.view.
